RE: PRECISE PROTEIN

Dear Sir / Madam:

This is a 30-day notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Precise Protein**. The structure / function claims on all sizes and configurations of this product are identical. They are as follows:

Andrew Lessman's PRECISE PROTEIN™ is specifically designed to improve the quality of the protein and amino acid content in your diet by emulating the amino acid composition of critical organs and tissues, such as cardiac (heart) and skeletal muscle tissues, which are responsible for the majority of fat burning metabolism. The quality of the protein in our diet is now recognized as essential not only for the healthy maintenance of all the vital organs and tissues in your body, but also for the structure and function of every enzyme in your body, which are collectively responsible for all of the activities you perform. Just as a chain is only as strong as its weakest link, the quality of protein in your diet and its amino acid content is decisive in maintaining optimum health and physical performance. This convenient, concentrated source of amino acids offers exceptional support during periods of weight-loss, dieting, physical activity, stress or energy demand, especially during the recovery that follows.

Respectfully Submitted,

Shawn Tiller
